

Departmental Overview

The New Mexico Office of Archaeological Studies (OAS) has been providing cultural resource management services throughout New Mexico since 1952. OAS continues to fulfill the Museum of New Mexico's commitment to the highway archaeology program and has expanded to include a diverse client base. Our list of clients spans the breadth of private and public customers, yet much of the work that we have completed is for return clients.

Since 1952 OAS archaeologists have conducted over 800 archaeological projects and produced nearly 1,000 reports. We have worked throughout New Mexico, adjacent states, and northern Mexico, with reports available on projects in all areas.
